University of British Columbia, Vancouver
Department of Computer Science

CPSC 304 Project Cover Page

Milestone #: 1
Date: February 2, 2026
Group Number: 23

Name	Student Number	CS Alias (Userid)	Preferred E-mail Address
Isaac Anderson	86728508	iander05	isaacanderson@outlook.com
Cassandra Mojar	92309400	cmojar	cassiemojar09@gmail.com
Radhika Bajaj	67679217	rbajaj	radhika3663@gmail.com

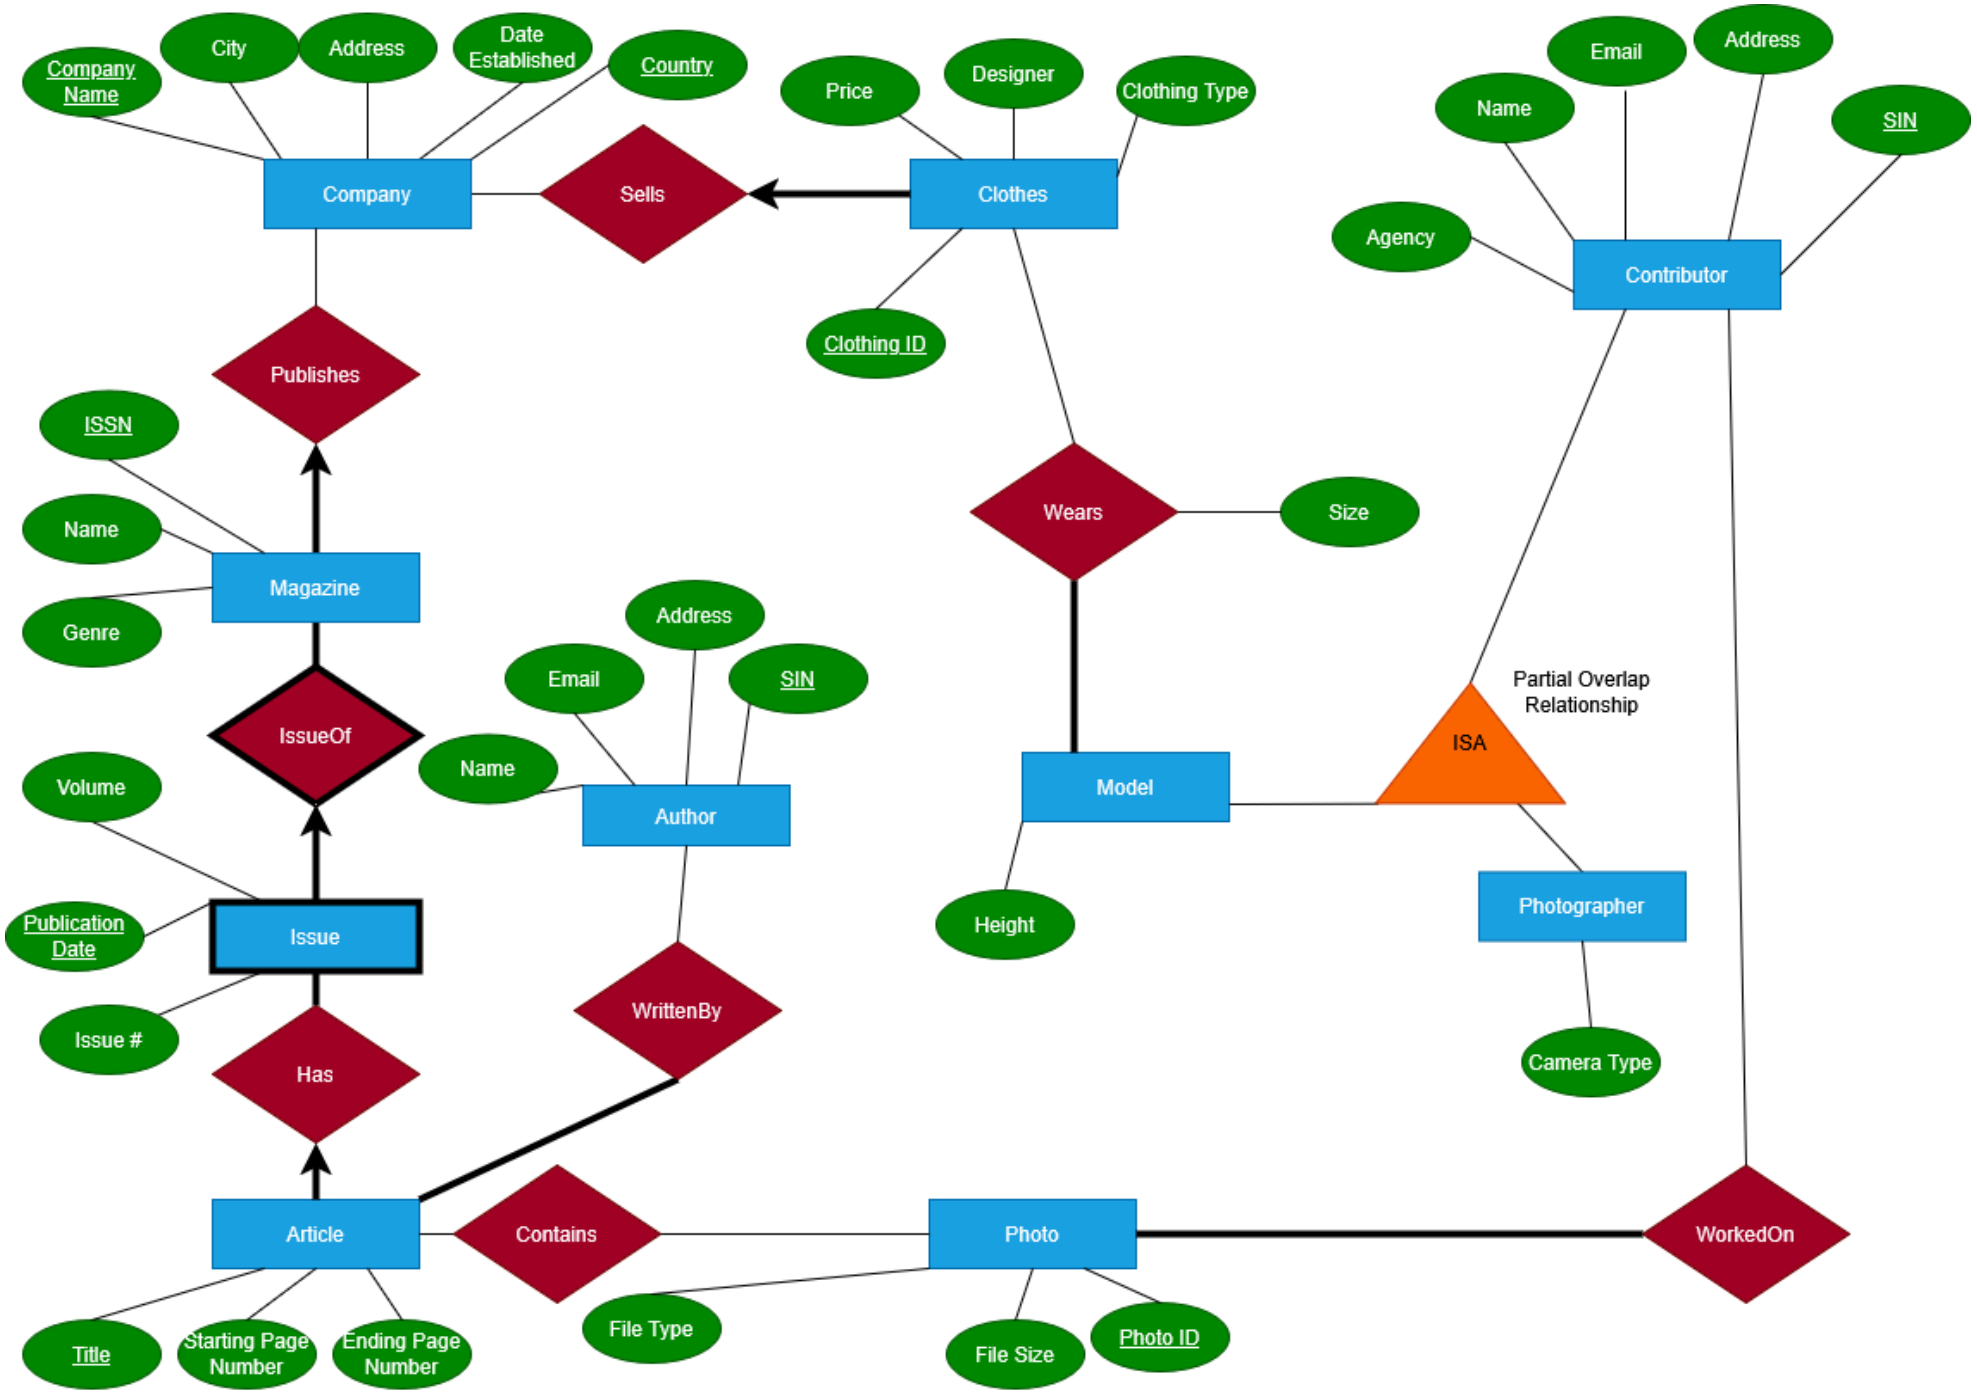

By typing our names and student numbers in the above table, we certify that the work in the attached assignment was performed solely by those whose names and student IDs are included above.

In addition, we indicate that we are fully aware of the rules and consequences of plagiarism, as set forth by the Department of Computer Science and the University of British Columbia

2.

a. The domain is Fashion Magazine Management, which organizes information about a particular magazine's publishing details and contributors. Its main purpose is to act as a historical archive that allows users to easily browse and reference past publications of a fashion magazine.
b. Our database models info about the magazine and publisher, then breaks things down by individual issues (like issue number/date) and what's inside each issue (articles and their page ranges). It also keeps track of the people involved, like writers, photographers, and models, plus the photos and other assets that appear in the magazine. On top of that, it includes fashion-related details like what clothing items show up, who wore them, the designer/brand, and even what company sells them.
